

Root Cause Analysis - HTTP 500 Production Incident

Incident ID: INC-2026-101

Date: 15-Jun-2026

Summary:

Users experienced HTTP 500 errors while accessing the Order Management application.

Root Cause:

Database connection pool exhaustion caused by slow SQL queries during peak traffic.

Evidence:

- Connection pool utilization reached 100%
- SQL response times increased from 50ms to 8s
- Similar incident occurred in May 2026

Resolution:

- Increased connection pool size
- Optimized slow queries
- Restarted application services
